Patrelle C, Ohst T, Picard D, Pagano A, Sourice S, Dallay M-G, **Plötner J** (2011). A new PCR-RFLP-based method for an easier systematic affiliation of European water frogs. Molecular Ecology Resources 11: 200?205.

Akin C, Bilgin CC, Beerli P, Westaway R, Ohst T, Litvinchuk SN, Uzzell T, Bilgin M, Hotz H, Guex G-D, Plötner J (2010). Phylogeographic patterns of genetic diversity in eastern Mediterranean water frogs have been determined by geological processes and climate change in the Late Cenozoic. J. Biogeography.

Plötner J, Uzzell T, Beerli P, Akin C, Bilgin CC, Haefeli C, Ohst T, Köhler F, Schreiber R, Guex G-D, Litvinchuk AN, Westaway R, Reyer H-U, Hotz H (2010). Genetic divergence and evolution of reproductive isolation in eastern Mediterranean water frogs. In: Glaubrecht M, Schneider H (Eds.), Evolution in action. Case studies in adaptive radiation and the origin of biodiversity. Special volume from the SPP 1127 ?Radiations - Genesis of Biological diversity. SPP of the DFG. Springer, Heidelberg, Berlin, pp. 373-403.

Plötner J, Köhler F, Uzzell T, Beerli P, Schreiber R, Guex G-D, Hotz H 2009. Evolution of serum albumin intron-1 is shaped by a 5' truncated non-long terminal repeat retrotransposon in western Palearctic water frogs (Neobatrachia). Mol. Phyl. Evol. 53: 784-791.

Köhler F, Schultze K-J, Günther R, Plötner J (2008). On the genetic diversity in the mitochondrial 12S rRNA gene of Platymantis frogs from Western New Guinea (Anura: Ceratobatrachidae). J. Zool. Syst. Evol. Res. 46: 177-185.
